

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 1. (currently amended) An image display method for
2 displaying description data including predefined attributes
3 each having text information and image information as an
4 attribute value described in a predetermined description
5 format, said image display method comprising the steps of:
6 extracting said attribute values from the description
7 ~~data indicating attributes for specifying the image~~
8 ~~information;~~
9 listing the text information of the extracted attribute
10 values;
11 selecting at least one attribute value from among the
12 listed attribute values; and
13 reading and displaying the image information specified by
14 the selected attribute value.

1 2. (original) The image display method as claimed in
2 claim 1 wherein said step of listing the extracted attribute
3 values lists alternative character strings to images inline
4 displayed in the description data.

1 3. (original) The image display method as claimed in
2 claim 1 wherein said step of listing the extracted attribute
3 values lists file names indicating locations of images inline
4 displayed in the description data.

1 4. (original) The image display method as claimed in
2 claim 3 further comprising the steps of selecting a format of
3 images inline displayed in the description data based on the
4 attribute values and listing images in the selected file
5 format.

1 5. (currently amended) A portable terminal comprising:
2 a display section for displaying description data
3 including predefined attributes each having text
4 information and image information as an attribute
5 value described in a predetermined description
6 format;
7 image selection and display means for extracting said
8 attribute values from the description data
9 ~~indicating attributes for specifying the image~~
10 ~~information~~, and listing the text information of
11 the extracted attribute values, and for selecting at
12 least one attribute value from among the listed
13 attribute values, reading the image information
14 specified by the selected attribute value, and
15 displaying the image information on the display
16 section.

1 6. (original) The portable terminal as claimed in claim 5
2 wherein the attribute values are alternative character strings
3 to images inline displayed in the description data.

1 7. (original) The portable terminal as claimed in claim 5
2 wherein the attribute values are file names indicating
3 locations of images inline displayed in the description data.

1 8. (original) The portable terminal as claimed in claim 7
2 wherein further a format of images inline displayed in the
3 description data is selected based on the attribute values,
4 images in the selected file format are listed, and an image in
5 any desired format is displayed on the display section.

1 9. (currently amended) A display method for displaying a
2 representation of a document on a portable display, said

document having one or more images, wherein the document is described in a data file using a predetermined description language including predefined attributes each having values of text information about one of the one or more images, said display method comprising the steps of:

extracting, from the data file, the corresponding attribute values of text information for each of the one or more images;

listing the corresponding attribute values of text information on the display;

selecting at least one of the listed attribute values;

and

displaying, on the portable display, image information about the image corresponding to the selected attribute value.

10. (canceled).

11. (previously presented) The method of claim 9, wherein said image information includes a graphical representation of the image.

12. (previously presented) The method of claim 9, wherein said image information includes information about a file of the image.

13. (previously presented) The method of claim 9, wherein said image information includes an indication as to whether the image can be displayed.

14. (currently amended) A method of displaying, on a portable display, a web page described by one or more data files, said web page having one or more images, said method comprising the steps of:

5 extracting, from the one or more data files,
6 corresponding attribute values including textual
7 information for each of the one or more images;
8 listing the corresponding attribute values on the
9 portable display;
10 allowing a user to select one of the listed attribute
11 values; and
12 displaying, on the portable display, image information
13 about the image corresponding to the selected
14 attribute value, wherein said image information
15 includes a non-graphical representation of the
16 image.

1 15. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes a textual description of the image.

1 16. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes information about a file of the image.

1 17. (previously presented) The method of claim 14,
2 wherein said image information further includes a graphical
3 representation of the image.

1 18. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes an indication as to whether the image can be
4 displayed by the portable display.
